

## ARTS Harmony™ Acoustical Panels

### *Style and Flexibility in Decorative Acoustical Panels*

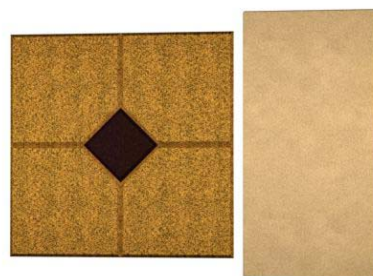

The necessary correction of most acoustical problems are our upholstered SoundBoard™ harmony panels. Utilizing 7lb. ft<sup>3</sup> fiberglass, our panels are the perfect solution in any room. Chemically hardened edges are available in square, bevel, miter and radius for a "tailored" look. Edges become part of the panel, so they will not 'show' through the fabric like other edge materials, such as wood or plastic extrusions.

Six standard sizes are available, from 2' x 2' to 4' x 8', and are in stock for quick delivery. In addition, Acoustic Innovations, Inc. specializes in the manufacture of custom size panels for use in any application. Please call for sizes.

Available from 1/2" to 2" thickness with your choice of 4 mounting options- Velcro™, Zipclips™, Z-Clips and adhesive. Panels can also be suspended from any ceiling, using our secure T-mount rails. Our skilled staff can create designs for your specific uses and needs, and when combined with hundreds of acoustical fabrics, styles and colors, create the perfect sonic and visual environment.

Harmony panels are finished in your choice of fabric, and are usually shipped within 10 days from date of order.

| <b>Model Numbers</b> | <b>Standard Size</b> |
|----------------------|----------------------|
| SAP22                | 2' x 2'              |
| SAP24                | 2' x 4'              |
| SAP25                | 2' x 5'              |
| SAP44                | 4' x 4'              |
| SAP28                | 2' x 8'              |
| SAP48                | 4' x 8'              |
