

ARTS Symphony Collection™ Acoustical Panels

Magnificent Acoustical Panel Assemblies

Combining superb acoustical performance and old world inspired handcrafted quality frames; the Symphony Décor Collection presents a unique opportunity to decorate your theater like a museum. Three unique curved-top designs enhance virtually any space.

Like our Maestro Panels, the Symphony Collection provides the solution for combining sound control and decorative accents in your home theater or media room. They also offer substantial sound correction benefit, resulting in proper soundstage localization, increased audio clarity and visual enhancement

When placed at a speakers' first reflection points; typically the sidewall boundaries and rear wall behind the main listening position, they will decrease reflected sound, which cause a blurring of the sound image and lack of intelligibility. The Symphony Collection panels will also reduce the overall sound volume in the room, enhancing low level dialogue and environmental effects delivered over today's high quality audio systems.

The Symphony Collection panels are available in 3 standard sizes: 3' x 5', 3' x 6' and 3' x 7'. A 3' x 20" panel is also available to use below a chair rail. Custom sizes are also available. Acoustical control is absorptive only. Fax us a plan of your room and let us recommend the correct solution for your space.

Fabrics can be selected from a wide variety of styles and colors from our extensive collection. All frames are cast with a wood tone that can be painted or stained to match existing materials in your home. Please contact an Acoustic Innovations Representative for additional options.
